

// INVESTOR SUMMARY — MAY 2026

# C & C's Fertilizer

CCFERT Token · AirFeed™ Hardware Platform · Reg CF Fundraise — October 2026

## The Opportunity

Synthetic nitrogen fertilizer is an estimated \$200B+ global market built on century-old infrastructure — centralized production, hazardous transport, and commodity price volatility. *[Third-party market source required before investor circulation]*

C & C's Fertilizer is developing a distributed, point-of-use alternative: a passive atmospheric nitrogen fixation device designed to allow homeowners and growers to produce bioavailable nitrogen on-site, on demand, without supply chain dependency. This is a hardware platform in active development with filed intellectual property, documented technical specifications, and a token-funded ecosystem designed to support commercialization.

## What Exists Today

Asset	Status
AirFeed™ concept design & product architecture	Complete
BoltBrew™ concept design	Complete
Two U.S. provisional patent applications	On file — patent pending
\$CCFERT token	Live on Solana mainnet since May 5, 2026
Token allocations & vesting	Locked and verifiable on-chain
Transparency receipts page	Live at <a href="https://airfertilizer.com/receipts.html">airfertilizer.com/receipts.html</a>
Prototype / field data	In development — not yet validated

## The Token Model

\$CCFERT is a fixed-supply Solana SPL utility token. Not a registered security. A funding and ecosystem participation instrument.

Parameter	Value
Total Supply	100,000,000 — fixed, no further minting
Mint Authority	Revoked May 5, 2026
Freeze Authority	Revoked — confirmed
LP Tokens	Burned — Raydium — May 5, 2026
Launch Date	May 5, 2026
Chain	Solana Mainnet · SPL Standard

Mint: 5BJu35uVVXWkmqjmUY8eAsP359nkk8TaK5E3xM6SHBR7

## Intellectual Property

Two provisional U.S. patent applications on file with the USPTO covering core device and airflow enhancement concepts.

	PPA #1 — AirFeed™	PPA #2 — VenturCap™
App #	64/052,149	64/071,827
Filed	Apr 28, 2026	May 21, 2026
Deadline	Apr 28, 2027	May 21, 2027
Status	Provisional · Pending	Provisional · Pending

*Provisional applications are not issued patents and do not guarantee patent issuance. Verifiable at [patentcenter.uspto.gov](https://patentcenter.uspto.gov).*

## Why Transparency Is a Structural Advantage

Most early-stage hardware ventures ask investors to trust management's reporting. C & C's Fertilizer asks investors to check the blockchain and the USPTO. Every wallet is labeled and publicly disclosed at [airfertilizer.com/receipts.html](https://airfertilizer.com/receipts.html). Every patent application is verifiable by number at the USPTO Patent Center. Every allocation claim can be confirmed against on-chain records. This structure is not incidental — it is the architecture of the project.

## What We Are Seeking

CCFERT is not conducting a registered securities offering. We are currently seeking:

- **Strategic partners** in agricultural distribution and cooperative extension networks
- **Grower pilot participants** for field validation of the AirFeed™ core device
- **Ecosystem contributors** — developers, agronomists, and advisors willing to accept token compensation for qualified contributions

*All engagement begins with a verifiable paper trail. Prospective participants are encouraged to conduct independent on-chain due diligence before engaging.*

## Risk Factors

### ■ Technology

Concept designs are in active development. Prototype performance data and independent validation are not yet available. Chemistry and output claims represent target design parameters, not validated results.

### ■ Market

Addressable market and household penetration assumptions are management estimates. Third-party verification recommended before reliance.

### ■ Token

CCFERT tokens are speculative digital assets. Token price is not guaranteed and may decline to zero.

### ■ Regulatory

Token classification and any Reg CF offering structure remain subject to legal review. Prospective participants should consult qualified legal counsel.

### ■ Regulatory

Token classification and any Reg CF offering structure remain subject to legal review. Prospective participants should consult qualified legal counsel.

### ■ IP

Provisional applications establish filing dates but do not guarantee patent issuance, claim scope, or enforceability. Non-provisional deadlines: Apr 28 & May 21, 2027.

### ■ Liquidity

CCFERT may have limited liquidity on decentralized exchanges. Participants may not be able to sell at a desired price or time.

### ■ Founder Concentration

Project is currently founder-led. Concentration in a single operator represents a governance and continuity risk.

C & C's Fertilizer / HVOKC, LLC · airfertilizer.com · erm@hvokc.com · 702-703-HALL · Surprise, Arizona

Token: \$CCFERT · Chain: Solana · USPTO: 64/052,149 & 64/071,827

*This summary is provided for informational purposes only and does not constitute an offer to sell or a solicitation to buy any security. CCFERT tokens are not registered securities. Market figures are management estimates and require third-party sourcing before investor circulation. Prospective participants should consult qualified legal and financial counsel before engaging. Prepared May 2026.*
